The photo above right shows her and other students of the College in 1928 and Lyman Jackson was added in 1929. Jackson, Kenestrick, and Stewart remained steady of the College in 1928 and Lyman Jackson was added in 1929. Jackson, Kenestrick, and Stewart remained steady.

Curriculum
The day to day instruction is one of the major offered by the College of Agriculture in the early 1930s. Students that were a part of the curriculum were followed by the professional curriculum in their junior and senior year of college. The professional curriculum consists of three main parts: the core courses, the major courses, and the minor courses. The core courses include a course in the teaching of vocational agriculture (VAC), a course in the teaching of vocational agriculture (VAC), and a course in the teaching of vocational agriculture (VAC). In addition to the core courses in the professional curriculum, other courses were also offered by other departments for teachers of agricultural education.

Agricultural Engineering
Sciences and Applications in Farm Shop
and Principles and Practice of Campus
Agricultural Engineering

Training Center Locations 1927 - 1937
The second decade started with five training centers: Worthington, Coshocton, Hilliard, Grove City, and Reynoldsburg. Worthington was discontinued as a training center in 1924 and a new center was established at Reynoldsburg. Reynoldsburg would last as a training center until 1937 when it would be replaced by West Jefferson. The other four centers had been constructed in 1924 and a new center was established at Reynoldsburg. Reynoldsburg would last as a training center until 1937 when it was added to the list. The other four centers had been established in the previous decade, other centers were also added by other departments for teachers of agricultural education.

Graduate Coursework
The graduate coursework consisted of a master's degree. Students that were interested in pursuing a master's degree had to complete a thesis in their field of study. The thesis was focused on the development of the body of knowledge for the field of agricultural education.

DEPARTMENT LOCATIONS 1927 - 1937
In 1927 the department moved to room 325 Campbell Hall. The upper Campbell Hall housed classroom space for the Department of Agricultural Education. One included a location for the chairman and a scrape area for the secretary and the other members of the staff.
