

ALSM Processed Data Organized by Survey Segment

This Table is organized by the Survey Segment. Each filename contains the Northing and Easting of the North East corner of that file. Each file has a length and width of 1km. For the Surfer data all of the data is processed in 11S except for SAF10 and SAF11 which are processed in 10S. There are over three thousand files for both the ASCII grids and the Surfer Grids.
