

Morgan Bair

Year of Service

2021-2022

Major Takeaways

Through my experiences I have been able to learn about the huge, diverse populations of people that can be served in the Columbus community. I have seen how each person has different needs, and that there isn't always one organization that can fulfill those needs.

Equitas Health

I chose a rather unconventional project to focus on, where I put together a research report for Equitas Health- a healthcare system in central Ohio specializing in LGBTQ+ care, sexual health, and combating the opioid epidemic. I wrote the report on the stigma that health providers have against opioid users, and how that inhibits the care that they provide. This service project was unusual because it didn't involve any direct contact with the people I was serving.

NSI Food Pantry

At the Neighborhood Services Inc. Food Pantry I was able to help assemble boxes of refrigerated groceries. I worked with the team to decide the type and amount of each product we were going to pack, and made specific boxes for anyone who designated a dietary restriction.
