 ...ment of students to find a balance between studying  
 ...a graduate and supporting themselves. With this  
 ...D., a degree scholarship, we hope to alleviate a little of the  
 ...t American stress on the recipients, and make life easier  
 ...for future generations of students.”

## MANSFIELD NEWS

### Berras Create First Chair at a Regional Campus

**Tim M. Berra**, zoology professor emeritus at Ohio State’s Mansfield campus, and his wife, **Rita M. Berra**, have made a gift to the Mansfield campus to endow the first-ever chair established at one of Ohio State’s regional campuses.

Named the Tim M. and Rita M. Berra Endowed Chair in Evolutionary Biology, in the Department of Evolution, Ecology, and Organismal Biology, the position has been created to continue the visible presence of evolutionary biology on the Mansfield campus.

“I hope the chair will eventually be filled by a scientist of international reputation who conducts field work abroad and returns to the Mansfield area to teach our students and explain the research, thereby enriching the local community,” Berra said. “I also want this bequest to honor my wife. She has made my life easier for all these years and has provided unselfish support, freeing me to pursue my research.”

Berra has worked at Ohio State’s Mansfield campus since 1972 and received two Fulbright Fellowships, published more than 60 scientific papers and five books, and spent six years doing field work in Australia. In 1995, he took early retirement to continue his research full time. He has served on the Board of Governors of the American Society of Ichthyologists and Herpetologists, as editor-in-chief of *The Ohio Journal of Science*, and as a member of the Board of Trustees of the Columbus Zoo & Aquarium.

“I’m pleased with the way my career has turned out and with what I have accomplished at a regional campus,” Berra added.
