

Team Approach

- Keep to the budget as much as possible and try to stay under
- Try not to need extra labtime and use in class time well to work as well as outside of class meetings
- Keep production of parts to a minimum or not at all if possible
- Maintain team cohesiveness and make sure everyone stays in contact and is updated on the project
- Ensure all AEV assignments are completed on schedule and to the highest standards
- Improve the AEV as far as possible without going over budget by increasing speed while decreasing power usage
