

Clinical Progress Template
Outpatient Hematology Clinical Experience Checklist
(BSN students)

Name of Student: _____

Name of Preceptor: _____

Assigned Clinical Site: _____

Professionalism

	Does not meet expectations	Meets expectations	Exceeds expectations	Comments:
Arrives to clinical on-time and prepared				
Follows university/hospital dress code				
Communicates professionally and respectfully with others				
Respects patient privacy and confidentiality in accordance with HIPAA				
Alerts preceptor / clinical instructor of any issues in a timely and responsible manner (ill days, late arrivals, patient issues, etc)				

Clinical Skills

	Does not meet expectations	Meets expectations	Exceeds expectations	Comments:
Uses patient identifiers as warranted				
Checks orders and verifies high risk medications				
Demonstrates proper hand hygiene				
Uses PPE and follows isolation/neutropenic precautions				
Demonstrates proper venipuncture and central line accessing for blood draws				
Checks orders and verifies high risk medications				
Documents notes or events in a timely manner				
Administers medications according to the "five rights"				
Gives and receives report to/from oncoming staff accurately and succinctly				
Observes or assists with chemotherapy administration				

Observes or assists with blood product transfusions				
Obtains vitals accurately and communicates abnormal values to preceptor/APP/MD				
Labels obtained lab specimens while in the patient's room / sends labs in a timely manner				
Observes/assists with clinic patient admissions and discharges				

Interpersonal Skills

	Does not meet expectations	Meets expectations	Exceeds expectations	Comments:
Communicates effectively with staff				
Demonstrates good customer service when interacting with patients				
Works well within a team				
Presents patients to medical team				
Effective listening skills				
Demonstrates cultural sensitivity and a respect for all persons				

Critical Thinking

	Does not meet expectations	Meets expectations	Exceeds expectations	Comments:
Understands rationale/indications for placed orders (imaging, medications, etc)				
Develops a plan for each clinical day				
Questions/clarifies orders				
Demonstrates adept problem-solving skills

Preceptor Signature: _____

Date: _____

Instructor Signature: _____

Date: _____

All the above skills are necessary to be a competent nurse. Use of personal protective equipment (PPE) is a safety factor for both the patient and the nurse. Using patient identifiers, checking orders, verifying high risk medications and hand washing is standard of care. The list under professionalism is important because as nurses we are professional and should act accordingly. Interpersonal skills are important because we should treat everyone like we would want to be treated or like we would want our loved ones to be treated. Communication is key in all relationships even temporary ones, so having good communication skills improves patient care. Critical thinking is an important skill that allows nurses to not just do our job but to be able to track patterns and predict possible outcomes as well as implement interventions as needed.
