The University of Delaware, Department of Chemistry & Biochemistry, is excited to announce a NSF-funded Research Experience for Undergraduates (REU) program – the Science and Engineering Leadership Initiative. Motivated by the realization that people with disabilities are significantly underrepresented in Science, Technology, Engineering, and Mathematics (STEM) disciplines, SELI strives to position today’s students with disabilities to become tomorrow’s leaders in academia and industry.

JUNE 4, 2018 – AUGUST 10, 2018
APPLICATION DEADLINE: FEBRUARY 1, 2018

» Participate in state-of-the-art research
» Meet like-minded peers
» Scientific field trips
» Mentoring for graduate school and STEM careers
» Expand your personal resource network
» Stipend and housing provided for 10-week program
» Present your work at the University of Delaware 2018 Undergraduate Research & Service Learning Celebratory Symposium
» Opportunity to present research results at the Spring 2019 American Chemical Society National Meeting
