

CUTTING-EDGE RESEARCH AT BYU

Fall Seminar Series: Get a taste of research happening in each area of chemistry at BYU

4:00 PM

SEPT 15

Jeremy Johnson (Physical)

Control of solid materials with intense terahertz light

SEPT 24

Kara Stowers (Inorganic)

Heterogeneous catalyst design in improving reduction and oxidation reactions

OCT 15

Steve Castle (Organic)

New strategies for the synthesis of unusual peptides and alkaloids

NOV 5

Ryan Kelly (Analytical)

One cell at a time: single-cell proteomics becomes a reality

NOV 10

Pam Van Ry (Biochemistry)

Galectin-1 therapy for use in muscular dystrophy

**Q&A from
11am-12pm:**

Have questions
about graduate school?
Join us on.....

Sept 17 Sept 25
Oct 19 Nov 6
Nov 13

RSVP to the seminar and/or Q&A
