

American Circumcision

*Movie Screening and Discussion at
Ohio State University*

The USA is the only country in the world where doctors routinely cut off much of the penis of newborn boys for medical reasons.

Join us **Thursday, April 11 at 6:30pm** in **University Hall 014** on the Ohio State University Campus for a screening of *American Circumcision*, a prize-winning documentary presenting notable supporters and critics of this practice at the intersection of culture, medicine, ethics, and religion.

After the film there will be discussion with Darcia Narvaez, Professor of Psychology at Notre Dame known for her column “Moral Landscapes” in *Psychology Today* and for her work on primal parenting and the concept of the evolved nest, (evolvednest.org); Ronald Goldman, PhD, author of *Circumcision: the Hidden Trauma* and of *Questioning Circumcision: A Jewish Perspective*, (cirp.org); and Torye May, a childbirth educator from Michigan.
