

# **Undergraduate Research**

## **Sagittal Alignment Following Single-Level Lumbar Interbody Fusion**

**Mason Darner**

### **About:**

The aforementioned project is a systematic review of the current literature pertaining to three approaches to fusion surgery. Some responsibilities include review of the literature and patient chart information, statistical analysis of radiological data, as well as preparations of the manuscript to be published later this year.

This research is being conducted under the supervision of H. Francis Farhadi, MD, PhD.

### **Takeaways:**

Through my involvement in this ongoing project, I have learned proper methods of research, improved my analytical skills, gained insight to the field of neurosurgery, and enhanced my confidence.
