

RACIAL BATTLE FATIGUE

Feb 23-24,
2023

Dr. William A. Smith is the Chief Executive Administrator at the Huntsman Mental Health Institute (HMHI) in the School of Medicine and the Department of Psychiatry. He is also a full professor and former department chair of Education, Culture & Society at the University of Utah. He coined the term Racial Battle Fatigue: the cumulative emotional, psychological, physiological, and behavioral effects of racial micro-level and macro-level aggressions (microaggressions and macroaggressions) on racialized Targets of White Supremacy. He summarizes this definition by saying it is a systemic race-related repetitive stress injury.
