faculty, staff, and students. The committee communicated that they will not be able to collaborate until autumn and will be starting their outreach in future faculty meetings this semester and expanding the offerings in autumn. GSAC discussed this more and wants to make sure that the education that is offered is beneficial to all students, so the group will be working on programming to prepare for autumn semester.		
Graduate Student Interdisciplinary Research Initiative (GSIRI) request • Mario met with Eric and Sahra and the rest of the organization, which is part of ORIC. • The committee was formed as a result of Eric working with interdisciplinary research and reduces biases and empowers grad students to gain more experience with leading research. • It was identified that there is a lack of understanding among students with this type of research and the opportunities available. • GISRI was wondering if anyone would be interested in joining the team in the future, particularly looking for reps from T&L and HN/OSUN? They are also looking for ways to collaborate with GSAC. • Eligible students cannot be funded by other type of research to participate in this type of funding. • Remaining meeting does not work with them but invited us all to attend. Meet every Friday at noon in Ramseyer. • Thinking about possible areas of collaboration • Somin (April 3) and Barbara (March 27th)?	Somin and Barbara will attend a future meeting to help identify ways to collaborate.	Ongoing
