Assignment A03- Problem Definition

Task

Urban sprawl has created many problems for modern society. One of the most significant problems is moving people from suburbs to downtown cores in a manner that is safe, efficient, and minimizes the effect on the environment.

Pains

- Traffic can be slow, especially during rush hour
- Reckless drivers
- Pollution
- Frequent construction required to maintain roads

Gains

- A new solution would cost commuters less
- A new solution would revitalize neighborhoods
- A new solution would restore green spaces

User Experience Chart

	Morning Commute	Distance to work	Family time	Driving Safety	Personal Space	Freedom	Schedule	Handicap Access	
++					++	++	++		
+									
0									
-	-	-	-					-	
--				--
