

Project Proposal Form

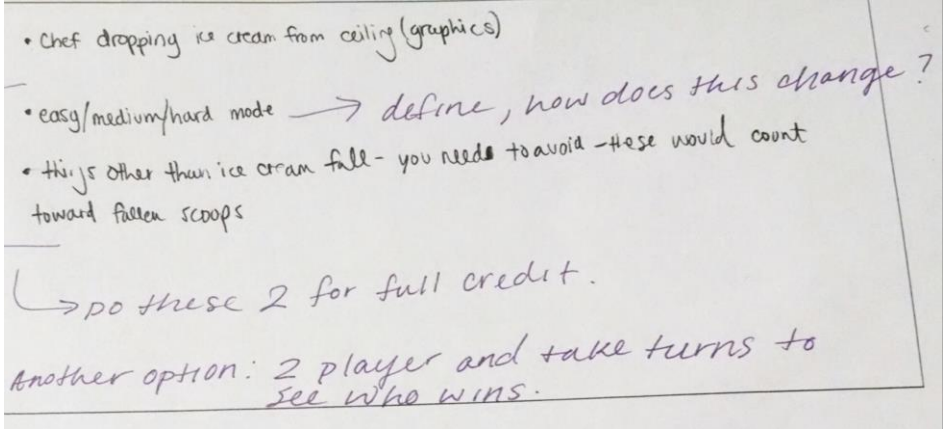

Instructor: LNC

Section: 8:00 AM

Team Name: MeGa SuPer

Team Members' Names: Matt Galla & Swathi Pillalamarri

Game Console: Proteus C/C++

Game (if not a common game include brief description)	Ice Cream Supreme – Ice cream falls from ceiling and you catch it by moving the cone at the bottom from side to side.
Basic Features	<ul style="list-style-type: none"> You have to move a cone (triangle) at the bottom of the screen to catch ice cream (circles) falling from the top of the screen. You can move the cone faster than the ice cream falls. Once your cone reaches the win line at the top of the screen, you win. If 3 scoops reach the ground, you lose. See game stats. Keep track of stats, reset, see instructions, play again.
Additional Features	 <p>• Chef dropping ice cream from ceiling (graphics)</p> <p>• easy/medium/hard mode → define, how does this change?</p> <p>• things other than ice cream fall - you need to avoid these would count toward fallen scoops</p> <p>→ do these 2 for full credit.</p> <p>Another option: 2 player and take turns to see who wins.</p>
