

that they are both safe. Alex takes this moment in their room to get on one knee and propose to her, despite all that happened that day. She cries tears of joy and tells him yes.

**Sci-Fi**

What to change:

- Conflict
- Resolution

The year is 3020 and Alex decides to surprise his girlfriend of five years with a vacation. When she hears the news she couldn't be more excited. They leave for a trip to space in only a few hours and Alex is already planning all of the activities that him and Lucy will go on together, she tries to sound excited, but she has such a bad feeling about what could go wrong. A few minutes later they land safely in Space in their newest turbo space jet. While Lucy is grabbing her luggage, Alex double checks to make sure the engagement ring is still in his pocket. He plans to propose while they are on an exciting zip line trip in space and she has no idea. Soon enough they can relax in their levitating hotel room after a day of travel. Waking up in a new dimension, they feel excited and completely relaxed. Alex hasn't told Lucy about anything that they are doing that day because he wants her to be surprised. They board the speed ship after breakfast to go to their first destination, which is the depths of space with an amazing view of the galaxy. The day is going very well for Lucy, and she has been nothing but happy and calm. They begin to enter the depths of the galaxy and she starts to ask what they are doing. He decides to tell her, and warn her what they are about to do. The nerves instantly fill her body, and her palms begin to sweat. "I cant do this. Something is going to go wrong. I want to go home", "I remember seeing something about an attack in space are you sure we should do this?". Alex tries to reassure her that hundreds of people do this everyday and there is nothing to be worried about. Lucy puts on a brave face even though she wants to jump out of the ship and transport home. They are starting to put on the safety equipment and there is a fear that Lucy has never felt before. She cant help but think of everything that can go wrong in this situation. Lucy has a fear being in space due to stories she has read, and doesn't have a good feeling about this. Their first zip line is the test run, which is very short and just gets you used to it. Lucy and Alex complete this and they feel the nerves are gone, they are having a blast. They reach zip line 9 out of 10 and they hear a loud and deep noise in the distance of the galaxy. They look around to each other and no one recognizes that sound. A few moments later these enormous objects fly all around them. They are shooting lasers at each and everyone of them, and they realize they are not wanted here. Quickly thinking, Alex remembers he packed his emergency laser gun and starts to fight off the space crafts. Lucy presses a button on her belt which enables her laser protective suit so she doesn't get hurt. Alex knows his laser gun isn't strong enough, so he has to try something different, that he has never done before. His family told him just before they left, if he ever needs more power in emergency, to press this button on his phone. Each persons does something different, but Alex is a lucky one. He doesn't know what this will do, so he kisses Lucy goodbye just in case, and presses the button. The biggest flash ever seen appears out of no where, and for a short time blinds and deafens everyone around. Next thing they know, Alex and Lucy are in a hospital being treated by robots at lightning speed. They are each given a serum to take and they look at each other hesitantly. The robot pushes it closer as if necessary. "Bottoms up" Alex says as they drink the serum. It's the next day and Alex and Lucy have no recollection of what happened the night before, as the resort did not expect this to happen, and didn't want to lose business.
