

5/17/18

Senior Resident (IM-Peds)...

discussed the importance of being early + prepared for rounds as well as following up w/ patient care throughout the day. (Consider taking on ~~some~~ ^{more} pts?) I need to be an advocate for my patient as well as the bridge to the care team. I need to become more of the core team by taking ~~initiative~~ initiative in expediting the process of obtaining outside medical records, labs, imaging, or anything else for the team + my patient. Continue to work on patient presentation as well as assessment + plan. Be confident, speak up, and take advantage of any and all learning opportunities.
