Plans complete, appropriate, timely, including all details and reflected appreciation of patient's experience of illness	5	1	100%

Question 13 of 14 - Mandatory

Question: Please describe your observations of this student's performance.

Total Responses: 1

1	Exemplary student. She worked with 9 different doctors during the month and got to learn each person's style of patient care. She was always eager to learn, always did any homework given and always asked appropriate questions to improve her knowledge and exam skills. Several patients complimented her in her presence and also in private to me. My colleagues and I all agree that she has been one of our best students to date.
---	--

Question 14 of 14 - Mandatory

Question: What might this student do to improve? (Name 1-2 with plan for how to improve)

Total Responses: 1

1	Never lose her drive to keep learning and improving as a Dr.
