

CRP2110 BLOG NO. 2

INSTRUCTIONS

These past couple weeks you have spent some time learning about what planners do, how they think, and how they impact the world. We also began to understand how a city's DNA (relationship between people and the built environment) create urban spaces. The lectures and video mentioned elements of:

- Form
- Design
- Environment
- Housing
- Equity
- Economy
- Communication
- Tech

Your task for Blog 2 is:

1: Each team member should write 100 words on what they believe is the most important element from the list above. If there are multiple people that agree on a single element, you can edit it down, but it needs to be over 100 words per team member. Make sure you tell me which members of your group picked which elements.

2: So far, you have spent some time thinking about and sketching out your ideal neighborhood. As a group, describe this ideal neighborhood, minimum 300 words. How has planning history shaped the vision of your city? What element(s) are present in your design? Provide at least one sketch or drawing to help explain your idea.

Blog 2 is due Thursday, February 2nd by 3:55pm.
