

initial view/  
vinyl record + slip

disk that looks  
like: ① is cut  
to emerge from  
underneath the  
black 1920 record

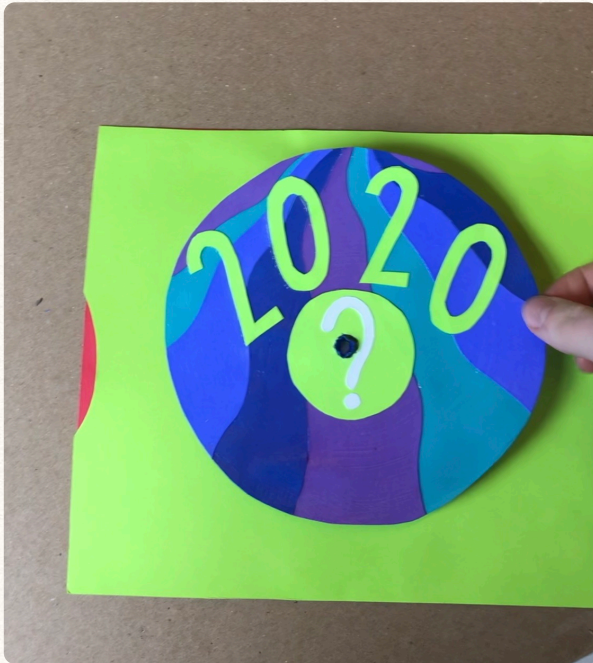

each triangle on  
the record resembles  
decades from  
1930-2010

After you reveal  
the decades and  
have wiped away  
the 1920s album,  
you can pull out  
another "record"

the record has  
"2020" on it with  
a "?" because it  
is unknown. The wavy  
lines represent  
paths that we  
will decide to go  
down and how we  
will define this  
decade

When you take  
out the "record"  
you are supposed  
to put it on the  
rib on the back  
and spin it because  
it is "the next  
record for us to  
Play"

\*the use of records is due to the fact that  
the use of records grew exponentially in the 1920s  
which contributed to the fascination with music throughout  
the last century as a whole
